DevOps & Tools	Copado, Flosum, Jenkins, Bitbucket, GitHub, JIRA, SDLC, CI/CD
Integration	MuleSoft collaboration, API troubleshooting, Azure DevOps collaboration, authentication & field mapping

PROFESSIONAL EXPERIENCE

Associate Consultant | 03/2025 – Present

Cappgemini Technology India Pvt. Ltd. | Client: Valmet Technologies Oy | Gurugram, India

- Triaged and resolved L1/L2 Salesforce production support tickets through ServiceNow, maintaining SLA adherence and minimizing user impact.
- Delivered high-volume Salesforce support for 1,500+ users, resolving 6,000+ tickets over 3 years with consistent SLA compliance and improved turnaround time.
- Led the Salesforce support team, mentoring team members, coordinating issue resolution, and driving continuous process improvements.
- Designed and implemented scalable automation using Record-Triggered Flows, Scheduled Flows, and Platform Events, reducing manual intervention by 30% while improving data accuracy and process turnaround.
- Managed profiles, permission sets, permission set groups, role hierarchies, public groups, sharing settings, login IP ranges, session settings, and MFA controls.
- Developed advanced Reports & Dashboards and optimized SOQL for analysis, troubleshooting, automation, and operational reporting.
- Executed release management using Copado and Flosum, including metadata analysis, sandbox refreshes, deployment validation, and post-release testing.
- Led UAT cycles by documenting expected vs. actual results, reproducing defects, coordinating fixes, and validating production readiness.
- Enhanced Experience Cloud Partner Portal configuration through page variations, visibility rules, partner user roles, and delegated administration.
- Collaborated with MuleSoft and Azure DevOps teams to troubleshoot API authentication, field-mapping inconsistencies, middleware failures, integration logs, latency, and certificate-based authentication dependencies.
- Supported Tacton CPQ by resolving product configuration logic, pricing rules, and data-integrity issues across custom CPQ objects.
- Restored Salesforce metadata and transactional data using OwnBackup during recovery and audit scenarios; conducted platform audits and monitored user activity.

Senior Analyst | 10/2022 – 03/2025

Cappgemini Technology Services India Limited | Client: Valmet Technologies Oy | Gurugram, India

- Configured record types, relationships, validation rules, custom and standard objects, and data structures to support business processes.
- Executed data migrations using Data Loader and Import Wizard while maintaining data quality and integrity.
- Developed SOQL queries and reporting solutions using standard and custom objects for operational analysis.
- Deployed custom Salesforce components including objects, fields, Apex classes, and Lightning Web Components using Copado/Flosum.
- Integrated external systems with Salesforce and developed Web-to-Lead functionality to automate lead capture.
- Stayed current with Salesforce platform features and best practices; received the Value Creator Award for scalable administration solutions and platform optimization.
- Received client commendation for high-quality support, collaboration, and ownership.

Analyst | 01/2022 – 10/2022

Cappgemini Technology India Pvt. Ltd. | Client: Belron | Gurugram, India

- Automated business processes using Process Builder and Flows and performed unit testing to improve reliability.
- Configured custom objects, fields, validation rules, picklists, page layouts, profiles, and roles for effective data and access management.
- Configured Workflow Alerts, Actions, and Approval Processes to streamline operational workflows.
- Troubleshot custom workflows and Apex-related issues and executed unit tests to validate core functionality.
